(width and length to any size order if required)

Module length	300 x 900 x 12	300 x 1200 x 12	200 x 900 x 12	200 x 1200 x 12
Model #	P300-9	P300-12	P200-9	P200-12

Design features

Radiant plate of light designed as supplementary task lighting or ambient domestic illumination.

Able to be suspended on cables and fittings, with power either by 'curly-cord' or via support wires.

Alternative face fixing to wall or ceiling soffit easily achieved.

Exceptionally bright and even; UV-free light from new-technology SMDs with on-board solid state electronic controls.

Technical features

Powered by high efficiency SMDs with rated lifetime of 50,000 hours giving a total light output of 900L per 300mm lineal at 7,600K. (warmer colours are less efficient)

230VAC supply to switch-mode power supply or 12VDC (wattage varies with total length).

Non-axial illumination gives shadow-free illumination on work surface.

Low surface radiation prevents glare.

Coloured options available on request.
